

Rainbow Sweets Experiment

You will need:

- Fruity, rainbow-coloured sweets
- Still, warm water
- Plate

Instructions

1. First, place the coloured sweets around the edge of the plate in a circle shape.
2. Then, get some warm, still water in a jug.
3. Next, pour the warm water into the middle of the circle until it reaches the sweets.
4. Watch the magic.

Why this works

The shells of the coloured sweets are made from sugar. When you add warm water, the sugar dissolves. As the colours meet, they mix, creating different colours.
